

Eating Disorders Association, Ireland

Description:

Help and Information line, support group meetings for people suffering from anorexia nervosa, bulimia nervosa and compulsive overeating and related self-esteem and body-image issues. We give information/awareness lectures and talks to schools, community groups etc., and we have a comprehensive list of treatment options and recognized qualified psychologists, therapists and counsellors in Ireland. We are launching a new programme of primary and secondary prevention based on the Dr. William Glasser's theories of Choice Theory/Reality Therapy, which will be aimed at primary and secondary school children, we are also doing research studies into the area of childhood and adolescent obesity and how we might prevent the increase of this problem.
