

## **Eat by Numbers**

### Description:

Providing nutrition support and guidance to individuals with eating disorders for over 20 years. Now, practicing via phone and email to help those who do not live near a nutritionist who specializes in eating disorders, or who might not have the time or means of transportation to keep regular office appointments. My service is perfect for anyone with frequent address changes. Email is encrypted for privacy. I've seen clients make it to the other side!
