

Alliance Counseling Center Eating Disorder Program and Referral Team

Description:

We are an outpatient program and sculpt our treatment plans to the needs of the individual. We can structure either a basic program or an intensive multiple appointments per week program that may include Equine Assisted Therapy. Our staff are all top notch licensed professionals and we communicate regularly with all team members. Family and friends involvement is suggested.

Our philosophy includes the idea that eating disorders are a symptom of a larger, deeper and more far reaching family/family of origin problem. Using psychoeducational and psychodynamic and equine assist models we seek to effect the entire system for the individuals full recovery.

We also offer FREE support groups and encourage anyone to attend who suffers from the effects of an eating disorder. Please see our separate listing under "Support Groups."

Although we are specialists in the treatment of eating disorders we welcome all types of referrals and make every effort to accommodate low income client.
