

UK Eating Disorder Therapy

Description:

Trainer, Master Practitioner of NLP, Hypnosis and Time Line Therapy and trainer of therapists. In depth continuing therapy for eating disorders, specialising in bulimia, comfort eating, emotional eating, compulsive eating and binge eating disorders. As well as providing therapy, I also teach other therapists how to deal with eating disorder issues and provide long term support for clients.

Every person is completely unique and the treatment design and therapy is completely tailored to their needs.

Using NLP, Time Line Therapy and occasionally hypnosis we look for the root cause and deal with the problem day by day.

This means that I expect 100% commitment from all clients and in return I provide therapy which includes 24 hr support and unlimited call and email support.

I provide one to one therapy and also group courses and workshops and hope to start running them in the USA as well as the UK.
