At Siskeene's Emerging Light, we invite you to the
re-emergence of your true potentiality. To review
your life "problems" as potential opportunities for
growth and to expand your level of awareness to a
new more positive perspective. As a team we draw
on a variety of psychological, spiritual and scientific
concepts to provide a foundation of balance and
validation for the individual. We view the whole
person as an integration of body mind/spirit and that
thoughts create emotions, and that emotions create
beliefs and beliefs ultimately define our physical
reality. To change our physical reality for the better,
we must go within ourselves and shift our thought
