

La Ventana Eating Disorder Program

Description:

Intensive outpatient program and day treatment program available. Provides treatment for adults as well as adolescents age 13 and up.

Our staff consists of experienced, licensed professionals, many in recovery from eating disorders themselves.

We believe in individualized treatment planning with the focus on long term recovery. We accomplish this through the most up to date treatment modalities available. Giving support, educational materials and new coping skills allows our clients to feel healthy and positive as they move through their recovery process.

Our program is also helpful for clients stepping down from inpatient care that would like to have continued treatment and support to assist them in their recovery process.
