

Boswell Center, The

Description:

Licensed Clinical Psychologist We offer a multidisciplinary approach to the treatment of eating disorders. Our focus is on wellness; i.e., the emphasis is on creating and building on healthy living, and moving away from symptoms. This "team" includes psychologists, registered dietitians, and medication management specialists; along with family therapists and psychotherapists who are trained in advanced visualization techniques. In addition, we offer metabolic assessment via the MedGem: an FDA-approved device which measures the amount of calories your body burns in a given day. We accept and file for most major insurance; and take credit cards. We have offices both at the beaches and "in town".
