

## **An Investigation into the Origins of Eating Disorders**

### Description:

Hi, my name is Michael Connolly and I am interested in constructing a greater understanding of eating disorders upon which more effective treatments may be developed.

The link provided below will take you to a 20 minute questionnaire which aims to identify some of the factors contributing towards the rise of eating disorders. A detailed description of what exactly the questionnaire involves can be found upon reaching the first page of the link provided below.

I would be most appreciative if you could take part

Thank you for your time

Michael
