

Caring for a Child with Anorexia

Description:

Are you the mother of a child receiving treatment for Anorexia? If so, I'd like to invite you to participate in an anonymous study examining the experience of caring for a child with Anorexia. This study will look at how families jointly cope with the illness. I hope these research findings will provide greater insight into how a child's illness affects the family, so that more support services can be developed to help parents.

To be eligible for this study, you must be the mother of a child with Anorexia and currently be in a committed relationship or marriage, co-habiting with your partner or spouse. If your child is between the ages of 10-21, is currently receiving outpatient treatment for Anorexia Nervosa, and is currently living with you and your spouse/partner at home, we invite you to participate in this important study.

To participate in this study, click on the following link (or copy and paste into your browser):
