

Affiliated NLP Medical Psychotherapy

Description:

MED, NLPC Certified Clinical Hypnosis, EMDR
Roslindale Boston Hypnosis-Behavioral Medicine
Day Evening Weekend Free Telephone Consults.
We have an excellent track record for treating
problematic medication side effects using meditative
psychotherapy, EMDR, nREM therapy and
Ericksonian Hypnotherapy for BiPolar, Panic
Disorder, Depression, IBS Irritable Bowel
Syndrome, Fibromyalgia, Chronic Fatigue
Syndrome. Some of our patients are doctors. We
also offer Besso Therapy. Besso Therapy is a
naturopathic meditation treatment—a neurosomatic
therapy--- which induces a prolonged, nonverbal
meditative state of profound stillness in body-mind
and results in slow-wave brain functioning (theta
waves), natural sedation and a sustained reduction
of anxiety and fear, so that healing can occur. This
nonverbal, non-conscious, deep meditative
procedure can be viewed as philosophic, somatic,
psychospiritual and integrative as it also
encourages unconditional body acceptance and a
nonverbal metaphysical understanding
