

Salem Hospital Nutrition Services

Description:

Registered Dietitian with 9 years' experience working with eating disorders. I am also a Certified Diabetes Educator. I specialize in anorexia and bulimia and see mostly teenagers and adults, but some children. I work as part of a treatment team including the person's physician or other health care provider, a therapist, the person with the eating disorder and (most of the time) family. Because the primary treatment for an eating disorder is psychotherapy, I request that anyone seeing me also be willing to work with a therapist.
